¹The category “Medicaid” includes persons who do not have private coverage, but who have Medicaid or other State-sponsored health plans, including the State Children’s Health Insurance Program (SCHIP).

²The category “Uninsured” includes persons who have not indicated that they are covered at the time of interview under private health insurance, Medicare, Medicaid, SCHIP, a State-sponsored health plan, other government programs, or military health plan (includes VA, TRICARE, and CHAMP-VA). This category includes persons who are only covered by Indian Health Service (IHS) or only have a plan that pays for one type of service such as accidents or dental care.

³Beginning in quarter 3 of 2004, two additional questions were added to the NHIS insurance section to reduce potential errors in reporting of Medicare and Medicaid status. Persons 65 years of age and over not reporting Medicare coverage were asked explicitly about Medicare coverage, and persons under 65 years of age with no reported coverage were asked explicitly about Medicaid coverage. Estimates calculated without using the additional information from these questions are noted as Method 1. Estimates calculated using the additional information from these questions are noted as Method 2.

⁴Poverty status is based on family income and family size using the U.S. Census Bureau’s poverty thresholds. “Poor” persons are defined as those below the poverty threshold, “near poor” persons have incomes of 100% to less than 200% of the poverty threshold, and “not poor” persons have incomes of 200% of the poverty threshold or greater. The percentage of respondents with unknown poverty status was 28.2% in 2004. See the NHIS Survey Description Document for 2004 (<http://www.cdc.gov/nchs/nhis.htm>) for more information on the unknown income and poverty status categories.

⁵Persons of Hispanic or Latino origin may be of any race or combination of races. Similarly, the category “Not Hispanic or Latino” refers to all persons who are not of Hispanic or Latino origin, regardless of race.

DATA SOURCE: Family Core component of the 2004 National Health Interview Survey. The estimates for 2004 were based on data collected from July through December 2004. Data are based on household interviews of a sample of the civilian noninstitutionalized population.
